IDENTIFIERS	*Tennessee

ABSTRACT

Statistical information is presented regarding high school graduates in Tennessee. Data of interest to planners, educators, and employers are presented in a county summary table followed by statewide totals and county tables presented alphabetically. Data is presented for numbers of schools and graduates, the number of students continuing education, the 1993 percentage of students continuing education, and the 1992 percentage of students continuing education. The information is based on a survey of public and accredited private schools that enroll high school students. Nearly 8% of graduates attended private schools. Of this group, about 96.2% expected to continue their education, while about 60.8% of public school graduates expected to continue. Almost 77% of graduates from the state's 4 largest counties expected to continue their educations, but only 56.2% from the remaining 91 counties and 4 special schools expected to continue. Dropout figures as counted by many schools might include students who transferred to other schools. (SLD)

INTRODUCTION

This publication provides statistical information regarding high school graduates to planners, educators, and employers in Tennessee. The data in High School Graduates are presented in a county summary table followed by statewide totals and county tables presented alphabetically.

The study is based on a survey of public schools, accredited private schools, and special schools in Tennessee that have high school students enrolled. Each table lists the number of schools and response rates as well as the number of graduates, their education and work plans, and the number of dropouts.

A special thanks is extended to school administrators and counselors who took time to answer this survey. Their cooperation will benefit the educators, employers, and planners across the state who will use this publication.

Note: Material in this publication is in the public domain and may be reproduced without permission of state government. Please credit the Tennessee Department of Employment Security, Research and Statistics Division, and cite the name of the publication.

HIGHLIGHTS

Tennessee's 1992-93 graduating class attended the state's 369 public and accredited private high schools. There are 58 city high schools, 224 county high schools, 83 private high schools, and four state special schools that constitute the universe of this survey. The special high schools are for the visual and and hearing disabled. Schools for the emotionally and mentally disabled and the Department of Youth Development schools were not included in the survey.

Approximately eight percent (7.6 percent) of the 1993 graduates attended accredited private schools. In general, a far higher percentage of graduates from private schools (96.2 percent) intend to continue their education than graduates from public schools (60.8 percent). The four largest urban counties (Davidson, Knox, Hamilton, and Shelby) accounted for 35.7 percent of all Tennessee graduates. Of the graduates in those four counties 76.6 percent plan to continue their education. In the remaining 91 counties and the special schools only 56.2 percent of the graduates plan on continuing their education.

The highest percentage of graduates continuing their education occurred in Moore County (85.0 percent), Pickett County (83.3 percent), Davidson County (80.3 percent), and Williamson County (80.3 percent). The lowest percentage of graduates continuing their education occurred in Haywood County (20.8 percent), Van Buren County (25.6 percent), Jackson County (29.0 percent), and Lake County (29.3 percent). Four counties had no high schools in their county complete this survey.

A 90.5 percent response rate was achieved in this year's high school survey. The figures are not absolute measures; they represent the **intentions** of the 1992-93 graduates. All data in this publication are **preliminary** accounts.

Graduates who did not fit into the categories of continuing their education, entering the labor force, or entering the armed forces were listed in the category of "other." These categories may not add to total graduates because of persons falling into more than one category (i.e. continuing education and entering the labor force).

N/A represents "not applicable" and is used where no schools, in a particular county, reported data.

Dropouts are students who left school before obtaining their high school diploma. Although the survey requested the number of dropouts, many schools subtracted the number of students at the end of the year from the number at the beginning of the year. This methodology could include students who transferred to or from another school and could give inaccurate data.

STATE SUMMARY BY COUNTY
